

## Government Shutdown

The effects of the federal government shutdown are being felt nationwide and there is currently no end in sight.

This has idled hundreds of thousands of workers and incredibly required hundreds of thousands more to report to work without pay.

We are proud to provide hard working Federal and Postal employee high quality health care and are here for you at this most troubling time

### What happens to my APWU Health Plan coverage while the Federal Government is shut down?

- In short you will receive the same high quality healthcare you have always enjoyed with APWUHP without interruption or change
- The APWUHP being fiscally responsible has significant reserves to pay out claims to all our members including those who are not receiving a pay check at this time.
- Additionally OPM has informed us in the unlikely event that the shutdown becomes excessively protracted it has the authority to access its reserves to assist FEHB plans with claims if it deems that is necessary.
